

Global experts defining Operation Excellence for the next-generation of semiconductor fab and foundries

2013

Began operation in Singapore

US\$62mil

Clients' savings via transformation projects within the first year of engagement

15

Global projects successfully completed

9

Cities covered through international projects

IGSS' Overview

[Read More](#)

A subsidiary of IGSS Ventures, a technology holding company

Pioneers in building & managing world-class semiconductor plants, foundry operation

300+
years

Leadership team's combined industry experience

Operation Excellence

[Read More](#)

Complete Plant & Engineering Solution

Technology Enablement & Collaboration

IT, Automation & Building Construction

Unique Differentiators

[Read More](#)

One-Stop solution to Semiconductor fab & foundry needs

Build-Operate-Transfer (BOT) fab projects with Hybrid Business model realises revenue within 2 years

Competitive cost structure with lowest funding/similar capacity

7-Step Methodology

2. Establish Gap Analysis

4. Identify Potential Solutions

6. Remove Barriers

1. Perform Diagnostics

3. Develop Pareto of Issues

5. Conduct Risk Assessment

7. Implement and Measure/Validate results

Clients' Successes (highlights):

20 - 40%

Cost improvement

15%

Shipment improvement within 2 months

12 - 22%

Capacity increase within 6 months

5%

Productivity breakthrough in 3 months

15%

Cycle-time improvement in 6 months
