

Fab Build-Operate-Manage-Transfer (BOMT)

diverse, tailor-made service solutions spanning complete life cycle for Greenfield Fab Startup projects

BOMT capabilities backed by a 7-step proven methodology

We understand that running fabs and foundries is a complex, high-stakes business. From turnkey or joint design to optimising existing manufacturing facilities, IGSS breadth of solution spanning concept, feasibility study, design, execution, operation and close out, are tailored with your unique needs in mind.

Supported by competitive cost structures and internationally-experienced leadership, IGSS, in partnership with a global network of experts, drive fab and foundry efficiencies and enable aspiring semiconductor nations and multi-billion-dollar entities looking to achieve key commercialisation objectives and revenue goals within two years.

Corporate Profile
