

Kelvin Lim

Chief Operating Officer (COO)

Kelvin brings to Innovative Global Services and Solutions (IGSS) more than 25 years of experience in the semiconductor industry. He joined IGSS in 2013 as the Chief of Staff and subsequently took on the role as the Senior Director of Operation before being promoted to IGSS' COO.

Known for his high-energy and drive, Kelvin specialises in result-oriented transformations in manufacturing, customer and capacity planning and operational management functions that delivers differentiated commercial strategies, improved efficiencies, reduced operating costs and increased productivity within tight budget and deadlines.

Kelvin has held several key management positions at an international foundry, serving as the Singapore Site Head for Industrial Engineering, Planning Director, and Head of Manufacturing and Production Control. He is credited for having successfully led the transformation of an integrated device manufacturer (IDM) Fab to a foundry. Other achievements include implementation of Micro-Electro-Mechanical Systems capacity fundamentals, achieving multi-million revenue growth rolled out through a margin optimisation taskforce and co-leading high-value technology and process migration projects.

A Six Sigma black belt pioneer for an international fab, Kelvin was among the first batch of accredited professionals in Singapore who successfully spearheaded high-visibility projects, locally. In March 2014, he was recognised by the Singapore Business Advisors & Consultants Council (SBACC) as a Practicing Management Consultant.

Kelvin holds a bachelor's degree with honours in Electronic Systems Engineering from the University of Essex, United Kingdom.
